Inventia Overview

IKN is an integrator industrial company with extensive experience in turnkey industrial and RD+i projects mainly for aerospace industry.

Founded in

2002

Private Capital

**Born into
Space!**

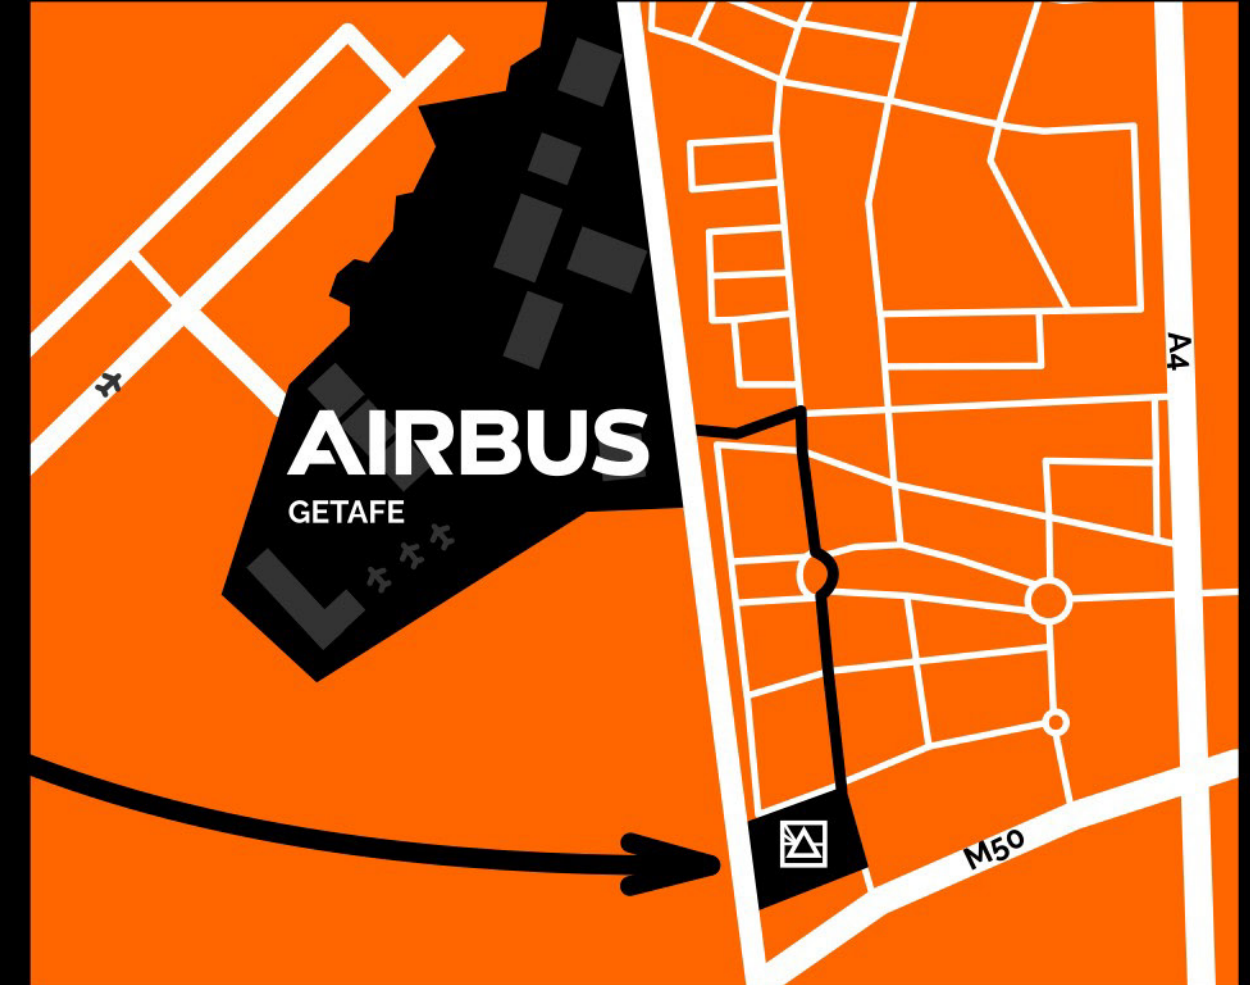

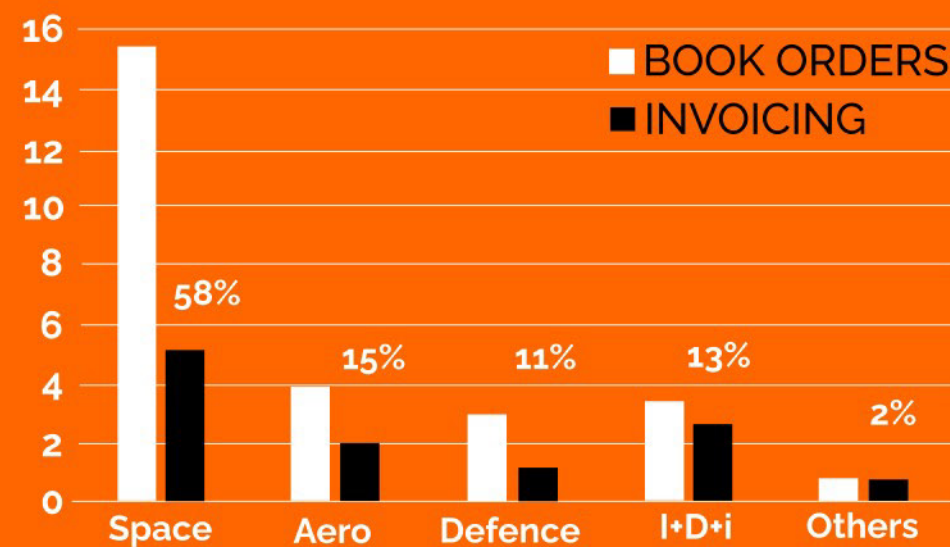

Employees **~100**

**Growing
Together**

Madrid
(Headquarters)

Seville
(Office-Aerópolis)

Own capabilities to carry out turnkey projects, from conceptual design to execution, up to commissioning of Special Machines and Automatic Production Lines and their associated Jig&Tools.

Values

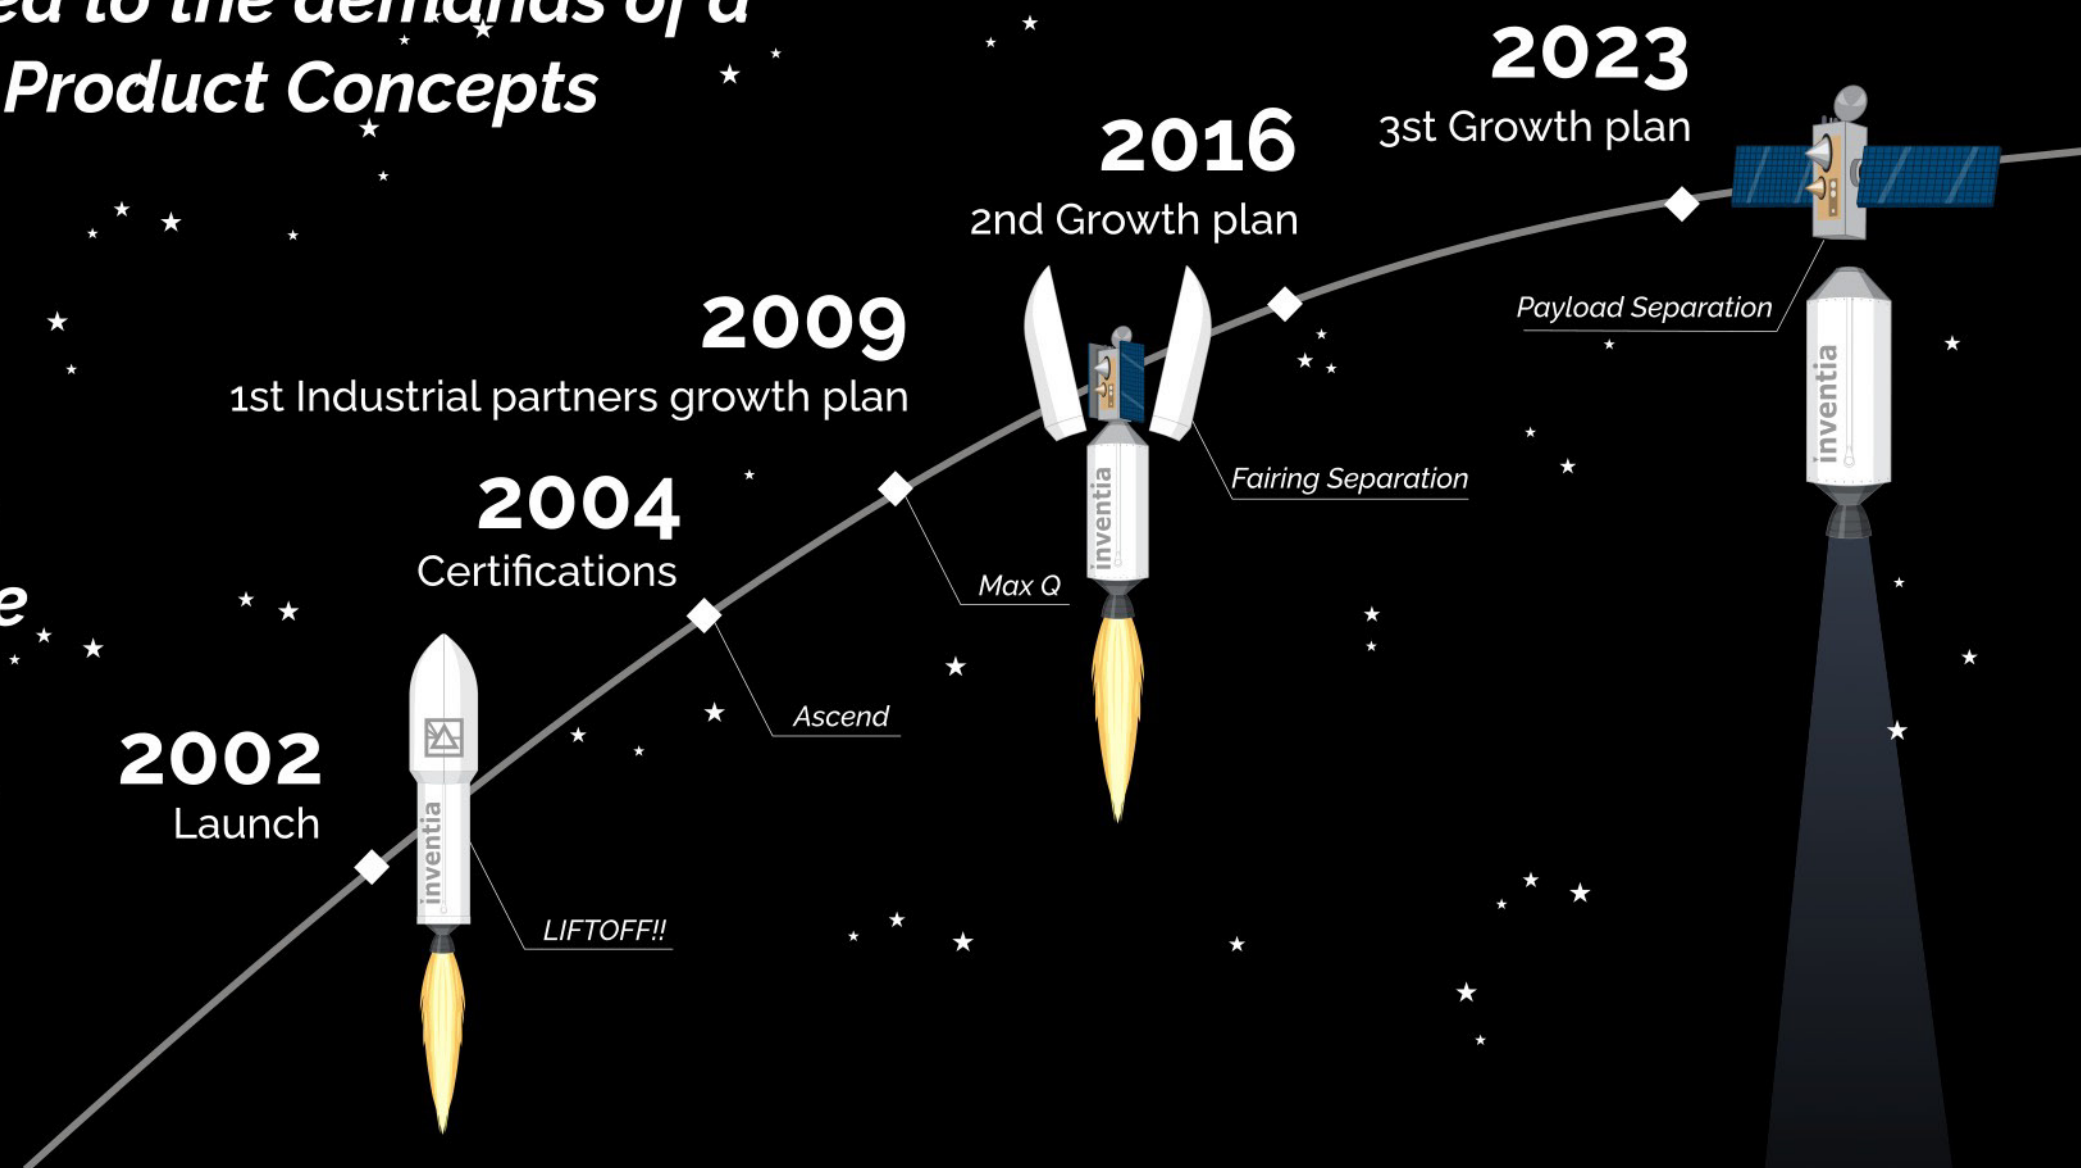

IKN operates as an open system, committed to generating value across all relationships, internal and external. We prioritize trust, transparency, and continuous improvement, leveraging our specialized expertise to grow sustainably with the support of our customers and partners.

Mission

IKN stands out for its expertise, flexibility and adaptability, thanks to a well-scaled structure aligned with customer needs. We offer agile, end-to-end turnkey solutions, from concept to commissioning, tailored to the demands of a competitive and evolving market, including New Product Concepts and strategic Tier 1 services for leading OEMs.

Vision

Our vision is to expand internationally, delivering high-quality products and services across Europe and beyond. We aim to strengthen our technological leadership and R&D capabilities, applying them within Industry 4.0 in close collaboration with our clients.

Facilities

Own clean room ISO8 that, together with machining of metallic and non-metallic parts, allows IKN to deliver assemblies of flight substructures for Space industry.

Workshop	+3.000 m ²
Offices	+1.000 m ²
NEW	+4.000 m ²

Workshop	7.500 m ²
Offices	1.600 m ²
Parking/Storage Area	9.500 m ²
TOTAL	17.000 m ²

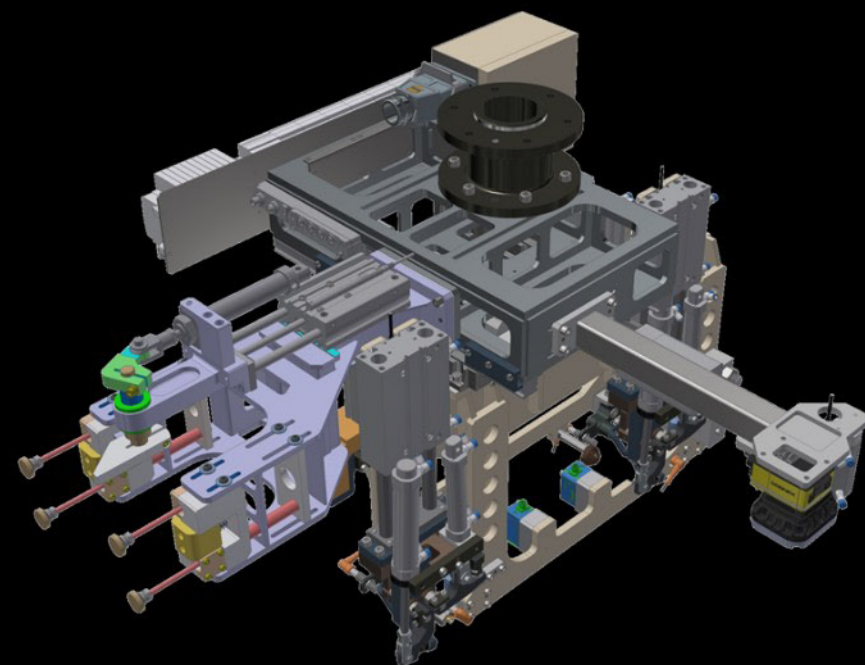

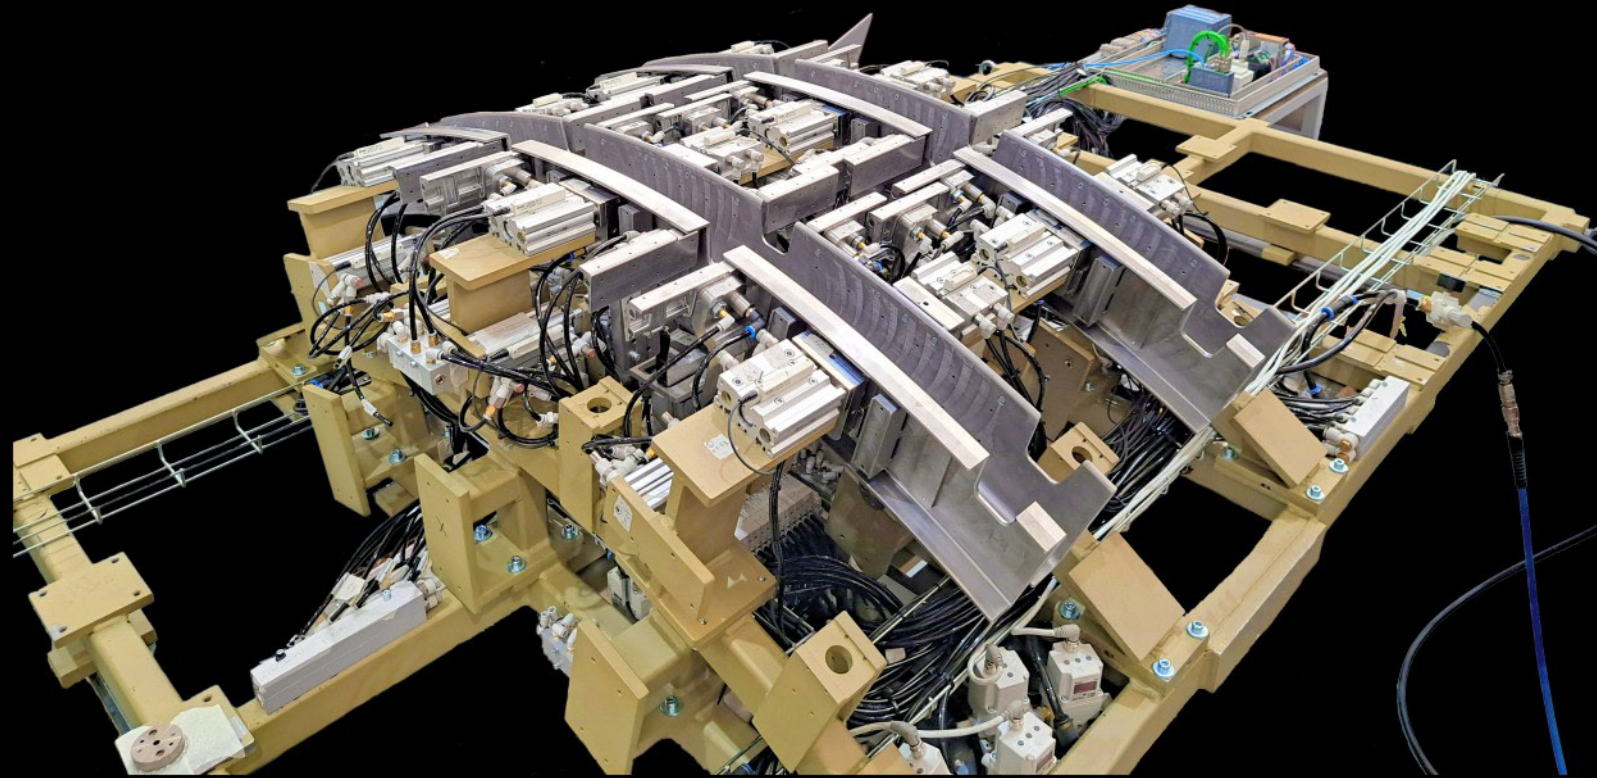

Assembly and integration area	3.450 m ²
Clean Room area	325 m ²
Verification area	110 m ²
Machining area	860 m ²
Welding area	350 m ²
Painting area	350 m ²
Electrical assembly area	50 m ²
